

Kumon Math Level 6A

Students begin to become familiarized with numbers up to 10 through counting pictures or dots and reading numbers.

When completing the Kumon worksheets at home, please follow these steps:

Do's	Don'ts
Write the name of your child, date and start time and end time on the 1st page only.	Force your child to write their name, date and time.
Read the direction of the 1st page only to your child.	Include the object name when counting.
Always read "Attention Parents" Notes on page 1a-b, 30b, 31b, 33b, 101b, and 151a	Force your child to check the box if they can't write.
Begin immediately after writing the start time.	Use the worksheets to teach another language.
Always work from left to right, top to bottom.	Require your child to count each object or picture if they are able to say the total number without counting.
Count the pictures/ dots while pointing to each one.	
If your child has difficulty with pointing on their own, you may guide their fingers as they count.	
If your child has difficulty with reading the numbers, model read the numbers and have your child read along with you.	
Praise your child when he/she has completed all the worksheets.	

**Attention Parents Notes: The notes on page 1a-b, 30b, 31b, 33b, 101b, and 151a contain tips on how to help your child count and read the numbers as well as number board practice activity.*

Other tips to supplement Kumon at Home:

- It is important to be involved in your child's learning by demonstrating how to read the numbers and reading along with them.
- Practice recognizing numbers in daily activity.
- Practice the magnetic number board while gradually increasing the number pieces.
